SOUND CUMULATIVE INDEX

VOL. 1 TO VOL. 6 (1967-1972)

From 1973 the title *SOUND* will be changed to *BRITISH JOURNAL OF AUDIOLOGY*.

(A)–Abstract, (BR)–Book Review

A'BROOK, M. F. Brief examination of psychological aspects of associations formed to promote control of aircraft noise, **6**, 37
Acoustic impedance meters, **2**, 40
Acoustics–standards, **3**, 17
Aircraft noise–Associations formed to promote control of, psychological aspects, **6**, 37
  Mental hospital admission and, **6**, 32
  Problems and deficiencies in aircraft noise research, **6**, 39
ALLAWAY, P. H.–letter from, **1**, 58
ALLEN, R. H. Re-appraisal of fixed frequency Békésy audiometry, **5**, 62
ALLEN, W. Problems and deficiencies in aircraft noise research, **6**, 39
ATHERLEY, G. R. C. Letter against routine audiometry in industry, **6**, 17 (replies, **6**, 18, 45)
Audiograms–pure-tone, frequency/response curves, optimum listening levels and, **3**, 37
Audiology–Bibliography. *See* RNID list of selected papers on audiology and allied subjects
  Diagnosis, evoked responses, **2**, 102
  Geriatric Audiology (BR), **2**, 98
  In neuro-otology, **3**, 61
  India, report on, **2**, 59
  Standardisation, **1**, 26
Audiometers–Calibration, standardisation, **1**, 26; **3**, 19
  Calibration service–is it really necessary? **1**, 7
  Routine calibration, **2**, 106
Audiometers–Test Reports
  Linco Paediatric AU-1, **2**, 50
  Madsen TBS 70, **1**, 14
Audiometry–advanced techniques, course in, **2**, 15; **3**, 29
  Ambient noise, **5**, 94
  Békésy, fixed frequency, **5**, 62
  Bone conduction, **2**, 13
  Bone conduction, clinical technique, **4**, 31
  Differential detectability index, **5**, 2
  Evoked response, **3**, 74
  Evoked response testing with sedation, **6**, 8
  Infant, **4**, 72
  Noise-attenuating enclosures for earphones, **5**, 90
  Object puzzle in children from mental age of three, **6**, 49
  Peek-a-boo audiometry, **3**, 75
  Pitch pipes. *See* Pitch pipes
  Probability of response to test sounds in young children, **5**, 7
  Pure tone screening tests in industry, **6**, 17
  Pure tone screening tests in schools–effects of ambient noise, **5**, 94
  Syringe for ear impressions, **5**, 106
Audiometry, speech–editorial, **1**, 82
  Developments, **2**, 3
  In conductive and sensorineural hearing loss, **5**, 30
  R.N.I.D. Technical Dept review, **2**, 99
Auditory ossicle metrices, histochemical study on, **3**, 44
Auditory tract–effect of lesions, **3**, 65
Auditory training units–Test Reports
